Lab 4 VibeCoding - Lava Escape - Code Repo Link

Assigned repo: https://github.com/SETAPESU26/52_lava-escape | Roll: 52_lava-escape

My updated code with all fixes is pushed here:

https://github.com/rohit-577/SELAB4

Open the link above to see the full perfect code. Clone and run with:

pip install -r requirements.txt
python main.py
Controls: A/D or Left/Right to move, SPACE / W / UP to jump, R to restart

What is fixed in this repo:

1. Task 1 - one-way platform bug fixed (prev_bottom check, only land when falling from above).
2. Task 2 - crumbling orange platforms, shake 1 sec then disappear.
3. Task 3 - yellow spring platforms, bounce vel_y = -22 with squash.
4. Task 4 - lava surge every 15 sec for 3 sec + DANGER meter + LAVA BURST warning.

Commits are separate for each task. Videos (before_fix.mp4 / after_fix.mp4, 10 sec each) and Chat_History doc are submitted along with this PDF.

Submitted on 1 Oct 2026 along with before/after videos and chat history.
